

01- TMDone Admin Console - Authentication Test Suite (AUTH-01 to AUTH-14)

Test Case ID	Test Name	Explanation
AUTH-01	Valid login - correct credentials redirect to dashboard	Verify that entering correct email and password successfully logs in the user and redirects from the signin page to the dashboard.
AUTH-02	Invalid username - wrong email shows error	Verify that entering an unregistered/wrong email address shows an error message and keeps the user on the signin page.
AUTH-03	Invalid password - correct email + wrong password shows error	Verify that entering the correct email but with a wrong password shows an error and keeps the user on the signin page.
AUTH-04	Empty fields - login should be blocked	Verify that clicking the Login button without filling any fields blocks submission and keeps the user on the signin page with validation errors.
AUTH-05	Username empty only - validation triggered even with password	Verify that leaving the email field empty while filling only the password field triggers validation and blocks login.
AUTH-06	Password empty only - validation triggered even with username	Verify that filling only the email field while leaving the password empty triggers validation and blocks login.
AUTH-07	Password hide/show toggle - eye icon works correctly	Verify that the eye icon toggles the password field visibility between masked (type="password") and visible (type="text").

AUTH-08	Tab navigation - keyboard moves focus username → password → button	Verify that pressing Tab key navigates focus through form elements: Email → Password → Login Button for keyboard accessibility.
AUTH-09	Login button click - submits form and redirects to dashboard	Verify that clicking the Login button with valid credentials submits the form and redirects to the dashboard.
AUTH-10	Enter key login - pressing Enter submits the form	Verify that pressing the Enter key after filling in credentials submits the login form (same as clicking the button).
AUTH-11	Field placeholder/label - username and password labels are visible	Verify that the login form fields have visible labels or placeholders for Email/Username and Password to guide users.
AUTH-12	Password masked by default - type is "password" on load	Verify that the password field is masked by default with type="password" and remains masked when text is entered.
AUTH-13	UI alignment - all form elements are visible and rendered	Verify that all login form elements (email input, password input, login button) are visible and properly rendered with non-zero dimensions.
AUTH-14	Whitespace handling - leading/trailing spaces in credentials	Verify that the application correctly handles leading and trailing whitespace in email credentials (either trimmed for successful login or rejected as invalid).

02-TMDone Admin Console - Dashboard Test Suite (DASH-01 to DASH-40)

Test Case ID	Test Name	Explanation
--------------	-----------	-------------

DASH-01	Dashboard page loads and URL is correct	Verify user can reach the dashboard after login and the URL contains "dashboard"; ensure page body contains content (not blank).
DASH-02	Sidebar shows all expected navigation menu items	Confirm sidebar contains all main navigation items (Dashboard, Reports, Campaigns, etc.).
DASH-03	Header navbar is visible with logo and brand name	Check top navbar, brand/logo link and TMDone app name are visible and correct.
DASH-04	Fullscreen button is present in the header	Verify the header contains a fullscreen toggle button and it is visible/clickable.
DASH-05	User profile menu opens and shows Logout option	Ensure the profile/avatar trigger opens a menu and shows Logout (and Change Password if present).
DASH-05b	Change Password functionality	Open Change Password, fill current/new/confirm fields and submit to verify the flow (skips if not present).
DASH-06	Logout works and redirects to the sign-in page	Click logout (sidebar or alternative) and verify the user is redirected to the signin page.
DASH-07	Clicking Dashboard sidebar link stays on dashboard	Click the Dashboard link in sidebar and confirm the user remains on the dashboard route.
DASH-08	Clicking Campaigns sidebar link navigates to Campaigns page	Click Campaigns in sidebar and verify URL contains "campaigns".
DASH-09	Clicking Stores sidebar link navigates to Stores page	Click Stores in sidebar and verify URL contains "stores".
DASH-10	Clicking Reports sidebar link navigates to Reports page	Click Reports in sidebar and verify URL contains "reports".
DASH-11	Clicking Offers sidebar link navigates to Offers page	Click Offers in sidebar (and submenu if needed) and verify the URL contains "offers".
DASH-12	Clicking Order Management sidebar link navigates to Order Management page	Click Order Management and verify the route/URL includes an order-related path.

DASH-13	Sidebar collapse/expand toggle works via hamburger button	Verify hamburger/sidemenu-collapse toggles the sidebar collapsed/expanded and links remain accessible.
DASH-14	Browser page title identifies the application	Check the page/tab title is present and meaningful (non-empty).
DASH-15	Dashboard shows Number of Accounts per Brand count	Verify the dashboard displays the "Number of Accounts per Brand" metric.
DASH-16	Dashboard shows Number of Accounts per Branch count	Verify the dashboard displays the "Number of Accounts per Branch" metric.
DASH-17	Dashboard shows OPENED status count	Confirm the OPENED status count/label is visible on the dashboard.
DASH-18	Dashboard shows BUSY status count	Confirm the BUSY status count/label is visible on the dashboard.
DASH-19	Dashboard shows CLOSED status count	Confirm the CLOSED status count/label is visible on the dashboard.
DASH-20	Dashboard shows New Assignments	Verify the "New Assignments" stat is present on the dashboard.
DASH-21	Dashboard shows New Notifications	Verify the "New Notifications" stat/area is present and visible.
DASH-22	Dashboard allows filtering by Today, Week, and Month	Check date-range/timeframe filters (Today/Week/Month or equivalent) are present.
DASH-23	Dashboard shows Top 10 Restaurants	Verify presence of the "Top 10 Restaurants" list/chart.
DASH-24	Dashboard shows Top 10 Stores	Verify presence of the "Top 10 Stores" list/chart.
DASH-25	Dashboard shows Top 10 Groceries	Verify presence of the "Top 10 Groceries" list/chart.
DASH-26	Dashboard shows Top 10 Roses & Gifts	Verify presence of the "Top 10 Roses & Gifts" list/chart.
DASH-27	Dashboard displays real-time data metrics	Ensure real-time metrics/stat elements are rendered and show numeric values.
DASH-28	Page refresh maintains user session and dashboard access	Reload the dashboard and confirm the user remains logged in and on the dashboard.

DASH-29	Notification bell/alerts icon is present in header	Verify a notifications/bell icon exists and is clickable to reveal notifications.
DASH-30	Dashboard stat cards are clickable and navigable	Check stat/summary cards are clickable and navigate to corresponding pages (if applicable).
DASH-31	Dashboard search/filter functionality is available	Look for a search or filter input and verify it accepts input and responds.
DASH-32	Dashboard export/download functionality is available	Check for Export/Download buttons (CSV/PDF) and visibility of export controls.
DASH-33	Dashboard is responsive on mobile viewport	Emulate mobile viewport and verify layout and key controls are accessible.
DASH-34	Dashboard supports keyboard navigation (Tab key)	Use Tab to navigate and confirm focusable elements receive focus in a logical order.
DASH-35	Dashboard loads within acceptable time	Measure page load time and assert it is within an acceptable threshold (configured in test).
DASH-36	Theme/Dark mode toggle is available (if applicable)	Verify presence and basic function of a theme/dark-mode toggle if the app offers it.
DASH-37	Breadcrumb navigation is present and functional	Check for breadcrumbs and that they reflect current location (and are usable).
DASH-38	Quick action links/shortcuts are available	Verify presence of quick action buttons (Create/Add/New) and that they are visible.
DASH-39	Dashboard footer contains app information	Scroll to page bottom and check for footer content (version, copyright, support links).
DASH-40	Dashboard session timeout handling	Simulate short inactivity and verify whether session persists or a timeout/warning appears.

03-TMDone Admin Console - Vendor Performance Tests (VP-01 to VP-13)

Test ID	Test Name	Explanation
VP-01	Vendor Performance page loads and URL is correct	Verifies post-login navigation to the Vendor Performance page and that the URL contains <code>vendor-performance</code> ; checks page body has expected content.
VP-02	Sidebar shows Vendor Performance link correctly	Confirms sidebar contains a link to Vendor Performance and that the link text/href match expectations.
VP-03	Vendor Performance page title/header is visible	Ensures a visible page heading/breadcrumb or fallback keyword in body indicating the vendor page is rendered.
VP-04	Filter dropdown elements are visible	Verifies presence of filter controls (mat-selects, date inputs) used to filter vendor data.
VP-05	Action buttons are present and visible	Checks primary action buttons (search, clear) are present and interactable.
VP-06	Data table area is visible	Confirms the main results area (table / mat-table / .table-responsive) is rendered.
VP-07	Page has meaningful content (not blank)	Ensures the page body contains non-trivial content to detect blank or error pages.
VP-08	Full page screenshot for visual reference	Captures a full-page screenshot and validates sidebar/navbar bounding boxes for visual sanity checks.
VP-09	Verify Excel Export and Row View/Edit actions	Tests export/download trigger and row-level view/edit action flows without errors.
VP-10	Date range filter allows selecting Today, Week, Month	Confirms quick-range buttons (Today / Week / Month) are clickable and apply filters.
VP-11	Custom Date Filter works correctly	Verifies selecting custom start/end dates from calendar and applying the search filters results.

VP-12	Store selection search feature works correctly	Ensures the store selector/search can find and select a store and apply the filter.
VP-13	Pagination - Next and Previous buttons work correctly	Validates table pagination by interacting with Next/Previous and confirming range/content changes.

04- TMDone Admin Console - Report

Busy Vendors Report

Test ID	Test Name	Explanation
BV-01	Navigate to Busy Vendors Report tab	Open the Reports page, select Busy Vendors tab, verify the page loads.
BV-02	Select a date range automatically	Click a quick date button like Today/Week/Month if available.
BV-03	Select a store from dropdown automatically	Open store dropdown and choose the first enabled store option.
BV-04	Search icon/button triggers data load	Click the search control and verify report content is present.
BV-05	Download/Export button triggers file download	Click download/export and confirm the file download event.

Cancellation Reasons Report

Test ID	Test Name	Explanation
CR-01	Navigate to Cancellation Reasons Report tab	Open the Reports page, select Cancellation Reasons tab, verify tab active.
CR-02	Select a date range automatically	Pick a quick date or calendar date range for the report.
CR-03	Select a store from dropdown automatically	Open store dropdown and select a valid enabled option if available.
CR-04	Search icon/button triggers data load	Click search and verify report content loads.
CR-05	Download/Export button triggers file download	Click download/export and verify a file download event.

Fulfillment Report

Test ID	Test Name	Explanation
FR-01	Navigate to Fulfillment Report tab	Open the Reports page, select Fulfillment tab, verify the report is visible.
FR-02	Select a date range automatically	Select a quick date or calendar range for the Fulfillment report.
FR-03	Select a store from dropdown automatically	Choose an available store option from the dropdown.

FR-04	Search icon/button triggers data load	Click search and confirm report results or empty state appear.
FR-05	Download/Export button triggers file download	Click download/export and validate download behavior.

Menu Optimization Report

Test ID	Test Name	Explanation
MO-01	Navigate to Menu Optimization Report tab	Open the Reports page, select Menu Optimization tab, verify it loads.
MO-02	Select a date range automatically	Choose a quick date or calendar date range for the report.
MO-03	Select a store from dropdown automatically	Select a store option from the dropdown if present.
MO-04	Search icon/button triggers data load	Click search and verify the report loads or shows an empty state.
MO-05	Download/Export button triggers file download	Click download/export and verify the file is downloaded.

Orders Count Report

Test ID	Test Name	Explanation
---------	-----------	-------------

OC-01	Navigate to Orders Count Report tab	Open the Reports page, select Orders Count tab, verify report page.
OC-02	Select a date range automatically	Select a date range for Orders Count.
OC-03	Select a store from dropdown automatically	Select a store from dropdown if present.
OC-04	Search icon/button triggers data load	Click search and confirm results or empty state.
OC-05	Download/Export button triggers file download	Trigger download/export and verify download event.

Sales Report

Test ID	Test Name	Explanation
SR-01	Navigate to Sales Report tab	Open Sales report tab and verify it is active.
SR-02	Select a date range automatically	Choose a date range for the Sales report.
SR-03	Select a store from dropdown automatically	Open store selector and choose a store.
SR-04	Search icon/button triggers data load	Click the search button and verify report output.
SR-05	Download/Export button triggers file download	Click download and validate the file download.

Target Offer Usage Report

Test ID	Test Name	Explanation
TOU-01	Navigate to Target Offer Usage Report tab	Open Target Offer Usage tab and verify it loads.
TOU-02	Select a date range automatically	Select a date range for Target Offer Usage report.
TOU-03	Select a store from dropdown automatically	Choose a store option from the dropdown if available.
TOU-04	Search icon/button triggers data load	Click search and verify report result or empty state.
TOU-05	Download/Export button triggers file download	Click download/export and confirm the download event.

05- Analysis - Performance Comparison Report (AN-01 AN-10)

testId	Test name	Explanation
AN-01	Analysis page loads and URL is correct	Verifies the Analysis page opens successfully and the current URL contains analysis; confirms page body has content.
AN-02	Date Range 1 - Select start and end date via calendar	Opens the page and selects a first date range using the calendar controls.

AN-03	Date Range 2 - Select start and end date via calendar	Opens the page and selects a second date range using the calendar controls.
AN-04	Store dropdown opens and first store is selectable	Opens the page, applies both date ranges, then checks that the store dropdown is enabled and a store option can be selected.
AN-05	Search icon/button triggers data refresh	Applies analysis filters and clicks the search control to refresh report data.
AN-06	Table data loads correctly after applying filters	Applies filters, then verifies either a visible report table exists with rows or at least page body content is present.
AN-07	Download button triggers file download	Applies filters and attempts to click the download/export button, then logs whether a download event occurred.
AN-08	Pagination - Next button navigates to next page	Applies filters and checks that the next pagination button is available and navigates to the next page.
AN-09	Pagination - Previous button returns to previous page	Applies filters, navigates next if possible, then verifies the previous pagination button returns to the prior page.
AN-10	Full flow - Date Range 1 & 2, Store, Search, Table, Next, Prev	Runs the complete analysis flow: apply both date ranges, select a store, search, verify rows, and exercise next/previous pagination if available.

06-Stores Manage Stores (ST-01 ST-13)

Test ID	Test Name	Explanation
ST-01	Stores page loads with table and controls	Verifies that the Stores page loads correctly with table, headers, and search controls visible

ST-02	Search filters stores by Cafe Asiana	Tests the search functionality by filtering for a specific store (Cafe Asiana)
ST-03	Store dropdown can select a store and search	Tests the store dropdown selector and search capability
ST-04	Status dropdown filters each available status	Tests filtering by status (Live, Busy, Suspended, Unsuspended)
ST-05	Zone dropdown can select a zone and search	Tests the zone dropdown selector for filtering stores by zone
ST-06	Combined filters can be applied and cleared	Tests applying multiple filters together and clearing them
ST-07	Export button triggers download or export action	Tests the export/download functionality for store data
ST-08	Pagination next and previous keep table usable	Tests pagination controls (next/previous) for navigating through store pages
ST-09	Create Store form opens and closes safely	Tests creating a new store form opens and closes without errors
ST-10	Cafe Asiana view action is available	Verifies the view action button is available for the target store
ST-11	Cafe Asiana edit action is available	Verifies the edit action button is available for the target store
ST-12	Cafe Asiana status action is available	Verifies the status (suspend/unsuspend) action button is available for the target store
ST-13	View Kopi Kade store details tabs	Tests viewing store details (Information, Business, Location, Operational Details, Documents, Others, Configurations)
ST-14	Close Kopi Kade store for 15 mins with reason	Tests closing the Kopi Kade store for 15 minutes via status action, selecting a reason and confirming the close dialog

07- Stores Ratings tests (SR-01 to SR-11)

Test ID	Test Name	Explanation
SR-01	Stores Ratings page loads with table structure	Verifies that the Stores Ratings page loads with table headers and rows, confirming basic module initialization
SR-02	Store dropdown selects a store and filters ratings	Tests the Store filter dropdown to select a store and verify ratings are filtered accordingly
SR-03	Rating type dropdown filters ratings	Tests the Rating Type filter dropdown to select a rating type and verify filtering works
SR-04	Store and Rating Type filters work together	Tests combined filters (Store + Rating Type) to ensure they work together properly
SR-05	Search control is visible and triggers data load	Tests that the search button is visible and functional, triggering the data load operation
SR-06	Clear control resets filters and keeps data shell visible	Tests the Clear/Reset button to verify filters are cleared while maintaining the module shell
SR-07	Export button triggers a safe download action when available	Tests export/download functionality when the control is available
SR-08	Pagination Next navigates when available	Tests the Next pagination button to verify it navigates to the next page when available
SR-09	Pagination Previous returns after moving Next	Tests the Previous pagination button to verify it returns to the previous page after Next is clicked
SR-10	Date range filter can be applied when available	Tests date range filter functionality to filter data by date range
SR-11	First row details action opens a safe view when available	Tests clicking on the first row's details/action button to open a details view or modal

09 - Order Management Tests (OM-01 to OM-11)

Test ID	Test Name	Explanation
OM-01	Order Management page loads and data table renders correctly	Opens the module, confirms order page URL, checks the table is visible, polls for rows, and verifies column headers.
OM-02	Status dropdown selects a status and filters data	Selects a status filter dropdown option and verifies the table updates after search.
OM-03	Secondary dropdown selects an option and filters data	Selects the second dropdown filter (zone/store) and confirms the results refresh.
OM-04	Date Range filter selects start and end dates	Opens date picker, chooses a date range, runs search, and checks filtered results appear.
OM-05	Search input works correctly	Fills the search box with an order identifier, triggers search, and verifies matching rows.
OM-06	Clear icon resets all filters and reloads data	Applies filters, clicks clear, and ensures the table refreshes to default state.

OM-07	Export button triggers file download	Clicks the export/download button and verifies a download event or export action.
OM-08	Pagination - Next button navigates to next page	Clicks next page and verifies the table navigates to the next page.
OM-09	Pagination - Previous button returns to previous page	Moves to the next page, then clicks previous to confirm navigation back.
OM-10	More actions / View order button functions correctly	Opens the first order's action/view UI and verifies details load or modal appears.
OM-11	Search by first visible Order ID returns matching order	Reads the first order ID from the table, searches it, and confirms the first result matches.

10- Portfolio Analysis

accounts-management (AM-01 AM-05)

Test ID	Test Name	Explanation
AM-01	Verify Accounts Management page loads with data	Confirms the Accounts Management page loads and the accounts table shell is visible, plus URL contains accounts-management.

AM-02	Search functionality filters accounts data	Verifies the search input filters rows, then clears search and reloads results.
AM-03	Verify accounts table headers and rows render correctly	Checks table header count and row count, ensuring the accounts table structure renders.
AM-04	Pagination next and previous work when available	Tests next-page navigation and then navigates back if pagination controls exist.
AM-05	First row action/edit control opens a safe view when available	Clicks the first row action/edit control and verifies a dialog/view opens safely or the module remains stable.

portfolio-analysis (PA-01 PA-05)

Test ID	Test Name	Explanation
PA-01	Verify Portfolio Analysis page loads correctly	Confirms the Portfolio Analysis page loads and the main container is visible, plus URL contains portfolio-analysis.
PA-02	Apply Filters (Date Range & Dropdowns)	Interacts with date picker and dropdowns, then clicks Apply/Search to validate filtering behavior.

PA-03	Verify Charts and Data Table load	Checks for chart elements and verifies whether the data table is present and has rows.
PA-04	Verify Export/Download functionality	Attempts to click download/export and observes whether a download event starts.
PA-05	Pagination - Next & Prev (If Table Exists)	Tests next and previous pagination navigation when table pagination is available.

11-Accounts Management (AM-01 AM-11)

testID	testName	explanation
AM-01	Verify Accounts Management page loads with data shell	Confirms the Accounts Management page opens and its main table/card shell is visible.
AM-02	Search functionality filters accounts data	Validates the search input filters account rows and that search can be executed and cleared.
AM-03	Verify accounts table headers and rows render correctly	Checks that the accounts table renders with headers and at least zero rows.
AM-04	Pagination next and previous work when available	Verifies pagination controls navigate forward and back when enabled.

AM-05	First row action/edit control opens a safe view when available	Ensures the first row action/edit control can open safely without breaking the module.
AM-06	Select store and account manager, then search	Selects Store and Account Manager filters, runs search, and verifies filtered table remains visible.
AM-07	Download accounts data when available	Attempts to trigger an account data download/export action and confirms it completes safely.
AM-08	Bulk upload control opens and accepts a file selection safely	Opens bulk upload, attaches the CSV fixture, and verifies file input is present.
AM-09	Download Account Manager list when available	Attempts to trigger an Account Manager list download and confirms the action is handled.
AM-10	Row Assign action process works after selecting an account manager	Selects an account manager, finds a row Assign action, clicks it, and validates the table remains visible.
AM-11	Row Delegate action process works after selecting an account manager	Selects an account manager, finds a row Delegate action, clicks it, and validates the table remains visible.

TestID	Test Name	Explanation
CAM-01	Campaign list page loads with table and primary controls	Verify the campaign list page displays correctly with primary UI controls and table structure.
CAM-02	Campaign search filters the list without breaking the grid	Confirm campaign search works and the results grid remains intact.
CAM-03	Create Campaign dialog opens and required fields are present	Validate the Create Campaign dialog launches and required input fields exist.
CAM-04	Row action menu exposes campaign actions	Check that each campaign row action menu shows available campaign actions.
CAM-05	Campaign view opens and shows management sections	Ensure campaign detail view opens and management sections are visible.
Step 0	Validate required fields on Create Campaign dialog	Confirm validation errors appear when required create campaign fields are empty.
Step 1	Create a new Campaign (2-step flow)	Create a new campaign through the two-step campaign creation workflow.
Step 2	Verify created Campaign exists in list	Confirm the newly created campaign appears in the campaign list.

Step 0	Verify Campaign list filters and table controls	Validate campaign list filters, sorting, and table control behavior.
Step 1	View the latest Campaign details	Open the most recent campaign and verify that details display.
Step 2	Verify key fields of the latest Campaign	Check important campaign fields for correctness in the campaign detail view.
Step 3	Verify Campaign Order Summary	Validate the order summary section within the campaign detail page.
Step 0	Delete confirmation can be cancelled safely	Verify campaign delete confirmation can be cancelled without deletion.
Step 1	Edit the latest Campaign	Edit the latest campaign and confirm changes are applied.
Step 2	Delete the Campaign	Delete a campaign and verify it is removed successfully.
PC-00	Verify Promo Code management page and create action	Confirm promo code management page loads and create action works.
PC-01	Create and manage percentage promo code	Create a percentage promo code and verify it can be managed.

PC-02	Create and manage amount promo code	Create an amount-based promo code and verify management actions.
PC-03	Create and manage saveable wallet voucher promo code	Create a wallet voucher promo code and confirm save/manage flows.
PC-04	Create and manage common campaign voucher promo code	Create a general campaign voucher promo code and verify management.
PC-05	Create and manage first-time-only promo code	Create and manage a first-time-only promo code.
PC-06	Create and manage free-delivery promo code	Create and manage a free-delivery promo code.
PC-07	Create and manage first-time-only free-delivery promo code	Create and manage a first-time free-delivery promo code.
COF-00	Verify Campaign Offer management page and create action	Confirm campaign offer management page loads and create action works.
COF-01	Create percentage campaign offer from Campaign View Offers	Create a percentage offer via Campaign View Offers.

COF-02	Create static campaign offer from Campaign View Offers	Create a fixed/static value campaign offer.
COF-03	Create amount discount campaign offer from Campaign View Offers	Create an amount-discount campaign offer.
COF-04	Create store target type campaign offer from Campaign View Offers	Create a store-targeted campaign offer.
COF-05	Create category target type campaign offer from Campaign View Offers	Create a category-targeted campaign offer.
COF-06	Create item target type campaign offer from Campaign View Offers	Create an item-targeted campaign offer.
FD-01	Verify Campaigns - Free Delivery Management full page	Validate full free delivery management page loads correctly.
FD-00	Verify Create Free Delivery dialog opens without saving	Check the create free delivery dialog opens and cancel works.
FD-02	Create Free Delivery	Create a free delivery configuration.
FD-03	View Free Delivery	View free delivery details after creation.
FD-04	Edit Free Delivery	Edit an existing free delivery configuration.

FD-05	Delete Free Delivery	Delete a free delivery configuration successfully.
SP-01	Verify Campaigns - Store Pinning page	Validate the store pinning campaign page loads properly.
SP-00	Verify Create Store Pinning dialog starts at basic information	Ensure create store pinning dialog opens at the basic info step.
SP-02	Create Store Pinning	Create a store pinning campaign entry.
SP-03	View/check Store Pinning action	View and validate store pinning action details.
SP-04	Edit Store Pinning	Edit an existing store pinning entry.
SP-05	Delete Store Pinning	Delete a store pinning entry successfully.
Test 01	Verify Fixed Delivery Management page opens	Confirm the fixed delivery management page opens correctly.
Test 00	Verify Create Fixed Delivery Fee dialog opens without saving	Check the create fixed delivery fee dialog opens and can be closed.
Test 02	Verify Fixed Delivery table structure and data display	Validate fixed delivery table columns and displayed data.
Test 03	Search functionality	Confirm search works in fixed delivery fee management.

Test 04	Create Fixed Delivery Record	Create a fixed delivery fee record.
Test 05	Search and verify created Fixed Delivery	Search for and confirm the created fixed delivery record.
Test 06	Edit Fixed Delivery Record	Edit an existing fixed delivery record.
Test 07	Delete Fixed Delivery Record	Delete a fixed delivery record.
Test 08	Verify Fixed Delivery page responsiveness and UI elements	Check page responsiveness and UI elements on fixed delivery page.
Test 09	Verify pagination (if available)	Validate pagination behavior if the table supports it.
Test 10	Verify sorting capabilities	Confirm table sorting works for fixed delivery records.
Debug	Check available campaign sections	Inspect available campaign sections in the campaign view.

14-Driver KPI slabs — Test Table

Test ID	Test Name	Explanation
DKPI-01	Driver KPI Slabs page loads with main controls	Validates that the main Driver KPI Slabs page renders and shows key controls.

DKPI-02	Filters, search, and pagination are usable	Checks that filters, search, and pagination work on the Driver KPI Slabs page.
DKPI-03	Create Driver KPI slab flow opens and validates/submits safely	Verifies create-slab flow opens and can validate/submit correctly.
DKPI-04	Edit Driver KPI slab action opens expected form	Confirms edit action opens the correct form for a slab.
DKPI-05	Delete Driver KPI slab action opens confirmation and cancels safely	Ensures delete action shows confirmation and cancel works safely.
AAT-01	Average Attendance slab scheme page loads with main controls	Validates the Average Attendance slab scheme page loads correctly.
AAT-02	Average Attendance filters, search, and pagination are usable	Checks filtering, search, and pagination on Average Attendance slabs.
AAT-03	Average Attendance create slab flow opens and validates/submits safely	Verifies create flow for Average Attendance slabs opens and submits safely.
AAT-04	Average Attendance view slab action opens expected details	Confirms viewing an Average Attendance slab shows expected details.

AAT-05	Average Attendance edit slab action opens expected form	Validates edit action opens the correct Average Attendance slab form.
AAT-06	Average Attendance delete slab action opens confirmation and cancels safely	Ensures delete action shows confirmation and cancel works for Average Attendance slabs.
BLC-01	Block Count slab scheme page loads with main controls	Validates the Block Count slab scheme page loads correctly.
BLC-02	Block Count filters, search, and pagination are usable	Checks filtering, search, and pagination on Block Count slabs.
BLC-03	Block Count create slab flow opens and validates/submits safely	Verifies create flow for Block Count slabs opens and submits safely.
BLC-04	Block Count view slab action opens expected details	Confirms viewing a Block Count slab shows expected details.
BLC-05	Block Count edit slab action opens expected form	Validates edit action opens the correct Block Count slab form.
BLC-06	Block Count delete slab action opens confirmation and cancels safely	Ensures delete action shows confirmation and cancel works for Block Count slabs.
NOF-01	Number of Fines slab scheme page loads with main controls	Validates the Number of Fines slab scheme page loads correctly.

NOF-02	Number of Fines filters, search, and pagination are usable	Checks filtering, search, and pagination on Number of Fines slabs.
NOF-03	Number of Fines create slab flow opens and validates/submits safely	Verifies create flow for Number of Fines slabs opens and submits safely.
NOF-04	Number of Fines view slab action opens expected details	Confirms viewing a Number of Fines slab shows expected details.
NOF-05	Number of Fines edit slab action opens expected form	Validates edit action opens the correct Number of Fines slab form.
NOF-06	Number of Fines delete slab action opens confirmation and cancels safely	Ensures delete action shows confirmation and cancel works for Number of Fines slabs.
SOD-01	Speed of Delivery slab scheme page loads with main controls	Validates the Speed of Delivery slab scheme page loads correctly.
SOD-02	Speed of Delivery filters, search, and pagination are usable	Checks filtering, search, and pagination on Speed of Delivery slabs.
SOD-03	Speed of Delivery create slab flow opens and validates/submits safely	Verifies create flow for Speed of Delivery slabs opens and submits safely.

SOD-04	Speed of Delivery view slab action opens expected details	Confirms viewing a Speed of Delivery slab shows expected details.
SOD-05	Speed of Delivery edit slab action opens expected form	Validates edit action opens the correct Speed of Delivery slab form.
SOD-06	Speed of Delivery delete slab action opens confirmation and cancels safely	Ensures delete action shows confirmation and cancel works for Speed of Delivery slabs.
RDR-01	Redispatch Rate slab scheme page loads with main controls	Validates the Redispatch Rate slab scheme page loads correctly.
RDR-02	Redispatch Rate filters, search, and pagination are usable	Checks filtering, search, and pagination on Redispatch Rate slabs.
RDR-03	Redispatch Rate create slab flow opens and validates/submits safely	Verifies create flow for Redispatch Rate slabs opens and submits safely.
RDR-04	Redispatch Rate view slab action opens expected details	Confirms viewing a Redispatch Rate slab shows expected details.
RDR-05	Redispatch Rate edit slab action opens expected form	Validates edit action opens the correct Redispatch Rate slab form.
